

ChillClean

Keep Your Cool: Unlock Continual Drain Efficiency in Commercial Refrigeration.

- Continual time-release cleaning
- Sits in the drain pan
- Prevents buildup, clogging, odors and more.
- Easy to use. One simple step.

Say goodbye to clogged drains, foul odors, and costly repairs with Chill Clean, the simple solution for maintaining commercial refrigeration drainage systems. We've been treating drains for almost 40 years, and understand the challenge. Chill Clean is the go-to choice for businesses serious about preserving the efficiency and longevity of their refrigeration units.

Prevent Costly Repairs

Neglecting drain maintenance can lead to water damage, increased energy consumption, and health hazards due to buildup. But with Chill Clean, you can proactively protect your investment and avoid the headaches of unexpected downtime and repair bills. Keep your refrigeration units running at peak efficiency with Chill Clean.

Ensure Food Safety and Quality

In the food service industry, hygiene is paramount. With Chill Clean, you can rest assured that your stored food products won't be ruined by drain problems. By preventing buildup, Chill Clean helps you maintain refrigeration units, ensuring that coolers remain efficient and upholding the highest standards of quality for your customers.

Prevent Foul Odors

The continual cleaning action of Chill Clean prevents buildup and the odors that come along with it. Prevent the negative stigma that comes along with moldy odors. The 24/7 action of Chill Clean ensures that your units are operational and odor free.

One Easy Step. Place Chill Clean in the drain pan and it does all the work, continually cleaning drains for 30 days
